Sir:

Prior to the examination of the above-identified patent application, please amend  
the application as follows:

IN THE SPECIFICATION:

Please amend the specification as follows:

I. On Page 6, lines 10-14, please delete the paragraph and replace it with  
the following replacement paragraph:

B1  
These rheological features are due in part to the degree of cross-linking and to  
the degree of swelling of the hydrogel. The hydrogel may be characterised in that the  
cross-linked polyacrylamide is cross-linked to such a degree so as to have an efficient  
cross-linking density of about 0.2 to 0.5%, preferably about 0.25 to 0.4%.

II. On page 6, lines 31-35, please delete the paragraph and replace it with  
the following replacement paragraph:

B2  
As stated, in all aspects of the invention wherein the hydrogel comprises less  
than 3.5% polyacrylamide by weight, based on the total weight of the hydrogel, the
